1/8/2021

The program has made progress on the recommendations. Moving forward, I especially encourage the continued focus on the success of the program's students.

Recommendation 1) The program removed a track from the BS after consultation with their advisory board and consideration of community needs. The program also addressed hidden prerequisites.

Recommendation 2) The program is able to be taught with the current level of full-time and part-time faculty.

Recommendation 3) The AAS was not revised, but is stacked into the BS.

Recommendation 4) A name change is not recommended at this time.

Recommendation 5) It is recommended that the AAS be re-opened for admissions and that the faculty continue their efforts to increase enrollment, as well as retention and graduation rates.

Decision: The college should put forward a formal request to re-open admissions to the AAS degree. Both the AAS and BS will be scheduled for a Follow-up Program Review in AY24.

Final decision: P[illegible]
adjustments as per the above comments.
